

Beyond 3D Design

Beyond 3D Design: New Ways to Benefit from SolidWorks

Presented by CATI and Inflow Technology

What:

Free Half-day Seminar
This seminar will update attendees on three important new technologies which can significantly improve core operations in your company.

Why:

Learn how to:

- ◆ Better automate design
- ◆ More effectively manage design workflows
- ◆ Deliver product information across the company with new, easy-to-use, compatible and cost-effective applications

When:

April 19, 2007	Milwaukee, WI
April 24, 2007	Buffalo Grove, IL
April 26, 2007	Indianapolis, IN

Who:

- ◆ Technology Executives
- ◆ Engineers
- ◆ CAD Managers
- ◆ Customer Service Managers
- ◆ Documentation Writers with product responsibility for your company

Presented by:

Featuring:

Agenda:

8:30-8:45: Breakfast

8:45-9:10: **Consolidating the Benefits of 3D**, Rod Levin, President, InFlow Technology. In this keynote presentation, Mr. Levin, who leads Inflow's work in helping clients benefit from advanced technology, will detail how 3D design technologies form a new basis for better information flow throughout companies' operations.

Product Information Everywhere

9:10-10:10: **Introducing Seemage 4.0**
Seemage delivers "product information everywhere" so that SolidWorks users can create rich product deliverables during the product design process itself, eliminating costs and rework. This introduction will show how delivering design information beyond the engineering department massively improves a company's ability to document, service and manufacture its products.

10:10-10:30: Break

Product Data Management Software for the Enterprise

10:30-11:30: **SolidWorks PDMWorks Enterprise**
Learn how to access, store, change and approve design data more efficiently with this easy to use and customizable system.

Rules Based Design Automation for Companies that Engineer to Order

11:30-12:30: **DriveWorks**
This session will overview a SolidWorks plug-in that uses rules-based capabilities to automate design. With DriveWorks, design-to-order is easily accomplished.

12:30 and later: Optional Q&A and discussion

Registration:

Seating is Limited, Registration is Required.
